

Canonical Facts

VERSION 1.0 · DRAFT

2026-08-05

PROJECT CONTROLS INSTITUTE GLOBAL, INC.

AI proposes. The professional disposes.

— About this document

Series	Publication Framework
Version	1.0
Status	draft
Date	2026-08-05
Unresolved placeholders	6

Notice. This document is an educational publication of Project Controls Institute Global, Inc., and does not constitute accounting, tax, legal, financial or other professional advice. It must not be relied upon as such. Where a topic depends on the contract or the governing law, entitlement and treatment vary by jurisdiction; take local advice.

Standards. Standards and frameworks are referred to by name and described in this publication's own words. No standard's text, tables, diagrams or question banks are reproduced. All trademarks remain the property of their respective owners, and no endorsement by any standards body, employer or vendor is implied or should be inferred.

Status. Project Controls Institute Global, Inc. is a Delaware Non-Stock Corporation. The Institute has been developed with reference to ISO/IEC 17024 personnel-certification principles and is **not accredited** by ANAB, IAS or any other accreditation body. It intends to seek 501(c)(3) recognition, which has not been granted. No governmental approval, academic equivalence, or guaranteed employment, promotion or salary outcome is claimed or implied.

Examples. All worked examples are illustrative and fictional. Figures are chosen to demonstrate a method, not to describe any real project, organisation or market. Sample examination items, where they appear, are study material maintained separately from any live examination bank.

Completeness. Passages marked **[CONFIRM: ...]** are operational or market facts that have not yet been confirmed from a cited source. A document carrying them is a working draft and is not approved for publication.

Canonical Facts

Read this before writing a single word. Every name, code, number and legal statement used across the 100 documents comes from here. If a fact is not in this file and not cited from a named source, it is a **[CONFIRM: ...]** placeholder — not a guess.

Sourced from the live platform ([backend/](#)) and the published document set, verified August 2026. Where the platform and a legacy document disagree, both are shown and the conflict is flagged.

1. Credentials — names and codes

The Institute certifies a **suite of three co-launching credentials**, all at Leader level.

Code	Full name	Display acronym	Category	Post-nominal prefix	Validity
PCL-AI	PCI AI Project Controls Leader	PCI PCL-AI	Project Controls	PCL-AI	3 years
PFL-AI	PCI AI Project Finance Leader	PCI PFL-AI	Project Finance	PFL-AI	3 years
PML-AI	PCI Project Management Leader - AI (en dash)	PCI PML-AI	Project Management	PML-AI	3 years

Portfolio name: **PCI AI Project Leadership Certification Suite**. Portfolio theme: Finance intelligently. Control predictively. Deliver successfully. — used only where it genuinely fits, never as a per-page slogan.

A fourth, separate offering (a certificate, not one of the three credentials): **AI in Project Controls — Specialist Certificate**, code **AIPC**. Open entry, no prerequisite. Assessed by scenario items plus an applied AI task. Drawn from Domain 13 of the PCL-AI Body of Knowledge.

1.1 Retired codes — never use these

PCP-AI · **PFIP** · **PFIP-AI** · **CPMD** · **CPMD-AI** · **PDL-AI**, and the retired name "Certified Project Controls Professional — AI".

This matters more than it looks. The Body of Knowledge in [docs/bok/](#), the candidate pack in [docs/publications/](#) and much of [docs/downloads/](#) were authored under **PCP-AI** and still carry that name internally. **PCP-AI became PCL-AI**. When any of the 100 documents draws on that material, it uses **PCL-AI**. Do not propagate the retired code, and do not "correct" the legacy files as part of authoring — flag them instead.

1.2 Naming rules

- Identifiers are stored and written **clean: no ™ or ® anywhere in PCI branding**.
- Third-party marks are acknowledged once, on a copyright page — not inline.
- British English throughout: enrolment, organisation, programme, recognised, modelling, behaviour.

— 2. The organisation

Fact	Value
Legal name	Project Controls Institute Global, Inc.
Short name	PCI · Project Controls Institute
Legal form	Delaware Non-Stock Corporation
Formed	2 October 2025 · Delaware File No. 10353271
Tax status	Intends to seek 501(c)(3) recognition — not yet granted
Domain	projectcontrolsinstitute.org
Contact	hello@projectcontrolsinstitute.org
LinkedIn	linkedin.com/company/project-control-institute
Slogan	"AI proposes. The professional disposes."
Brand colours	Primary #1D4ED8 · Navy #0E1525
Currency	USD

Mission line: The Project Controls Institute exists to certify the integrated discipline of project controls, cost engineering and project finance — to a single, modern, AI-ready standard. Four verbs: **Set the standard · Certify professionals · Build the profession · Research and inform.**

Training independence: PCI owns the standard and the examination. **Certuvo** is the separate official preparation and training partner. Never blur the two.

2.1 The accreditation statement — non-negotiable wording

PCI is **developed with reference to ISO/IEC 17024** personnel-certification principles. PCI is **not accredited** by ANAB, IAS or any other ISO/IEC 17024 accreditation body.

Never write, imply or allow a reader to infer: accreditation, ISO certification, government recognition, university equivalence, guaranteed employment or salary outcomes. Where status is relevant, state it plainly. The house formulation is "founding-stage", and the standard footer stamp is:

Founding-stage document · Version 1.0 — effective date to be confirmed · Reviewed under PCI governance. PCI makes no claims of accreditation or recognition beyond what is true today.

The Institute's own positioning values: **Substance over marketing · Fair, transparent process · Honesty about our status · Responsible, governed use of AI.**

2.2 Accreditation roadmap (as published)

1. Standard defined — **"We are here"** → 2. Student enrolment → 3. Accreditation → 4. Recognition.

— 3. The Body of Knowledge — 13 domains, 61 knowledge areas, 40/40/20

Three groups. The weighting is the spine of the whole credential and appears in S01, S03, S06 and S09.

Group	Weight	Domains
Project accounting & finance	40 %	D1-D4
Project management principles	40 %	D5-D12
AI knowledge & practical approach	20 %	D13

#	Domain	KAs
1	Foundations of Accounting for Project Controls	5
2	Financial Reporting & the Standards	5
3	Budgeting & Forecasting	5
4	Performance Management, Variance Analysis & Management Reporting	4
5	Cost Management & Cost Control	4
6	Earned Value Management & Forecasting (EVM/EAC)	4
7	Contracts, Commercial Management, BoQ, Invoicing & Revenue	5
8	Project Management Lifecycle	6
9	Agile, Scrum & Adaptive Delivery for Project Controls	6
10	Project Scheduling	4
11	Business Process Cycles (O2C, P2P & the control environment)	3
12	Risk Management for Project Controls	3
13	AI for Project Controls & PM: Concepts, Tools & Practice	7
Total		61

Numbering convention inherited from [docs/bok/00-style-spine.md](#): **Domain.KA.Topic** — e.g. 6.2.1.

— 4. Examination facts

4.1 Confirmed (platform-configured)

Fact	Value
Duration	90 minutes
Pass mark	65 %
Item format	Four-option multiple choice, single best answer
Cognitive levels	Recall · Application · Analysis — application-weighted
Scoring	Criterion-referenced, not graded on a curve
Formula sheet in exam	None provided
Launch window	Opens 15 minutes before; 30-minute grace period
Free reschedule	Up to 72 hours before; maximum 3 reschedules; bookings lock 24 hours before
Scheduling window	365 days; payment-to-schedule deadline 12 months
Default attempts	1 per authorisation; retake wait 0 days by default
Result	Immediate, with domain breakdown
Certificate validity	3 years
Interface languages	English, Arabic, Spanish, French, Korean, Chinese, Russian
Proctoring	Enabled: identity check, room scan, second-monitor block
Negative marking	None. Every item is weighted equally (Endpoints/StudentExam.cs , InitScorer)
Proctoring signals	Audit-only by default. Automatic invalidation is opt-in and switched off (Core/Lifecycle.cs) — a flag raises a review, it does not fail anyone
Evidence retention	evidence_retention_days defaults to 365, configurable (Core/RetentionService.cs)

4.2 Deliberately not yet fixed — say so, do not invent

Fact	Correct treatment
Number of items	No question count exists anywhere in the platform. Item counts "will be confirmed by a formal job-task analysis ". Never state a number.
Final pass mark	The published 65 % is the platform's configured mark; the definitive standard "will be set by a modified-Angoff standard-setting study". Say both.
CPD required hours	Student-portal target is 30 hours per three-year cycle ; the binding requirement "will be published with the recertification rules". <code>cpd_required_hours</code> defaults to 0. Do not present 30 as a rule.
Retake fee	Configured as 0 / inactive. Handbook says the retake fee is confirmed before booking. Do not quote a figure.
PFL-AI and PML-AI blueprints	No examination blueprint exists yet for these two — no weightings, no item counts. S06 covers PCL-AI only and says so.

4.3 Conflict flagged — exam fee

- Platform seed (`schema.sql`): exam **USD 500**, membership USD 99, renewal USD 99.
- Legacy candidate pack (`docs/publications/`, retired PCP-AI naming): **USD 350**.

Treatment: write `[CONFIRM: exam fee — platform seeds USD 500, legacy pack states USD 350]`. Do not pick one. Fees are also route-dependent and discountable, which is itself worth saying.

4.4 Eligibility

Three years of professional experience, in any field. No degree requirement. Full-time-equivalent; part-time counts pro rata; concurrent roles count once; self-employment counts; career breaks do not reset the clock. Verified on a sample or risk basis.

4.5 Recertification

Three-year cycle with a **mandatory AI-currency component**. In the platform, the CPD category satisfying it is literally named "**AI currency**" (`Core/CpdPolicy.cs`). Only approved CPD entries within the current cycle count.

CPD categories — two sets exist, and they disagree. Use the platform set; note the divergence.

Source	Categories
Platform API (<code>Endpoints/StudentExam.cs</code>) — authoritative	Structured learning · Practice & application · Contribution · Events & webinars · AI currency
Public pages (<code>recert.html</code> , <code>cpd-policy.html</code>)	structured learning · learning through work · contribution to the profession · formal study

The platform set has five categories and names the AI-currency one explicitly; the public set has four and does not. A candidate reading the website and then using the portal meets two different vocabularies. Write the platform set, and record the divergence — see §9.5.

— 5. Application routes

Public framing is **three routes into PCI: Standard · Founding member · Honorary Fellow (PCI)**.

Platform routes: [standard](#), [founding](#), [honorary](#) (no examination required), [sponsored](#), [complimentary](#), [waived_full](#), [waived_partial](#), [test](#) (non-public).

The honorary route does **not** require an examination — when writing about routes, be explicit about that, because a reader who assumes otherwise will feel misled later.

— 6. Membership grades (a separate ladder from certification)

Grade	Post-nominal	Requirement
Student Member	SPCI	—
Associate Member	APCI	—
Professional Member	MPCI	Requires an active PCI certification
Fellow	FPCI	By nomination

Membership ≠ certification. They are different ladders and must never be conflated in a document or a post. A credential is earned by examination; a grade is a membership standing.

— 7. Competency lists per credential (platform-authoritative)

These are the seeded competency sets. **S03 must build on these, not replace them.**

PCL-AI — 14 competencies: Project controls governance · Cost management · Planning and scheduling · Earned value management · Forecasting and EAC · Performance measurement · Project risk · Commercial and contract controls · Predictive analytics · AI-enabled project controls · Digital reporting · Automation · Responsible AI · Human validation.

PFL-AI — 19 competencies: Project finance · Infrastructure finance · Financial modelling · Investment appraisal · Capital structure · Debt and equity · Project bankability · DSCR/LLCR/PLCR · PPPs and concessions · Project contracts · Financial close · Commercial and financial risk · Sustainable finance · Islamic project finance · AI-enabled financial modelling · Predictive cash-flow analysis · Digital due diligence · Responsible AI · Human validation.

PML-AI — 24 competencies: Project management · Project leadership · Project initiation · Business cases · Governance · Scope and requirements · Planning and execution · Stakeholder leadership · Procurement · Contracts and commercial delivery · Cost/schedule/risk integration · Predictive delivery · Agile delivery · Hybrid delivery · Quality and change management · Benefits realisation · Sustainability · Project closure · AI-enabled project management · Decision intelligence · Digital delivery · Automation · Responsible AI · Human accountability.

— 8. Governance bodies

Responsible Officer · Chief Examiner / Assessment Lead · Certification & Impartiality Committee · Standards Committee · Appeals Panel · Subject-Matter Experts.

— 9. Known inconsistencies in the source material

Record these; do not silently resolve them, and do not repeat them.

1. **Credential level.** The database records all three credentials at level **Leader**; the public `certification.html` renders "Level: Professional". → Use **Leader**, and treat the competency-scale word "professional" (S03) as a distinct concept, clearly labelled.
2. **Exam fee.** USD 500 (platform) vs USD 350 (legacy pack). → **[CONFIRM: ...]**, per §4.3.
3. **Domain groups — the names differ, and so does the membership.** The legacy pack uses A. Financial Reporting & Accounting / B. Project Management, Controls & Delivery / C. AI for Project Controls; the current blueprint uses Project accounting & finance / Project management principles / AI knowledge & practical approach. More seriously, the legacy pack **assigns different domains to each group** — its Area A holds D1, D2, D5, D7, D11 and Area B holds D3, D4, D6, D8, D9, D10, D12, against the current D1-D4 / D5-D12 / D13. → Use the **current blueprint** for both names and membership. The legacy pack also publishes indicative **per-domain** percentages that are internally consistent only under its own grouping; the current blueprint publishes no per-domain weight, and those figures must not be carried forward.
4. **Retired naming throughout** `docs/bok/`, `docs/publications/`, **parts of** `docs/downloads/`. → Write PCL-AI; flag the legacy file rather than editing it.
5. **CPD categories.** The portal serves five categories; the public pages describe four different ones (§4.5). → Use the platform set. This one needs an operator decision, not an editorial one.
6. **Retake waiting period.** The platform default is `exam_default_retake_wait_days = 0`, while the predecessor candidate handbook states that "a short waiting period applies". → **[CONFIRM: ...]** naming both. Do not quote a number.
7. **Two scheduling clocks that interact badly.** The payment-to-schedule deadline is 12 months (`payments.exam_schedule_deadline`); the booking horizon is 365 days (`exam_default_window_days`). They are distinct: rescheduling moves the booking date but never extends the entitlement deadline, so a candidate who reschedules late can hold a valid booking for a date their entitlement no longer covers. → Say so explicitly wherever booking is described.
8. **The reschedule dead zone.** Free rescheduling ends 72 hours before; bookings lock 24 hours before. The rules do not say what happens in the 48-hour band between. → Genuine gap; **[CONFIRM: ...]**.
9. **Refund and cancellation terms.** Candidates must consent to a refund policy before booking, but its terms appear nowhere in the platform settings. → **[CONFIRM: ...]**; never invent terms.

— 10. House phrases worth matching

Used verbatim across the site and document set — reuse them so the 100 documents sound like the Institute:

- "AI proposes; the professional disposes."
- "explainable, validated and owned by a competent human"
- "developed with reference to ISO/IEC 17024 personnel-certification principles"
- "criterion-referenced, not graded on a curve"
- "a modified-Angoff standard-setting study" · "a formal job-task analysis"
- "founding-stage" · "We state our status plainly"
- "The credential for the people who control projects."
- "Open to anyone with three years' experience, in any field."
