

PCI Publication Framework — 100 Professional Documents

VERSION 1.0 · DRAFT

2026-08-05

PROJECT CONTROLS INSTITUTE GLOBAL, INC.

[AI proposes. The professional disposes.](#)

— About this document

Series	Publication Framework
Version	1.0
Status	draft
Date	2026-08-05
Unresolved placeholders	4

Notice. This document is an educational publication of Project Controls Institute Global, Inc., and does not constitute accounting, tax, legal, financial or other professional advice. It must not be relied upon as such. Where a topic depends on the contract or the governing law, entitlement and treatment vary by jurisdiction; take local advice.

Standards. Standards and frameworks are referred to by name and described in this publication's own words. No standard's text, tables, diagrams or question banks are reproduced. All trademarks remain the property of their respective owners, and no endorsement by any standards body, employer or vendor is implied or should be inferred.

Status. Project Controls Institute Global, Inc. is a Delaware Non-Stock Corporation. The Institute has been developed with reference to ISO/IEC 17024 personnel-certification principles and is **not accredited** by ANAB, IAS or any other accreditation body. It intends to seek 501(c)(3) recognition, which has not been granted. No governmental approval, academic equivalence, or guaranteed employment, promotion or salary outcome is claimed or implied.

Examples. All worked examples are illustrative and fictional. Figures are chosen to demonstrate a method, not to describe any real project, organisation or market. Sample examination items, where they appear, are study material maintained separately from any live examination bank.

Completeness. Passages marked **[CONFIRM: ...]** are operational or market facts that have not yet been confirmed from a cited source. A document carrying them is a working draft and is not approved for publication.

PCI Publication Framework — 100 Professional Documents

Status: framework v1.0 · **Owner:** Institute editorial coordinator · **Language:** British English

The Project Controls Institute's public publication programme: **one hundred professional documents** organised into ten series, each written to a single editorial standard, each with a defined route to LinkedIn and to the platform's Downloads Centre.

This directory is the **framework and the manuscripts**. It answers four questions in one place: what we publish, to what standard, in what order, and how each document becomes a piece of public teaching.

Positioning. These documents establish the Institute as a teaching authority. The rule inherited from [docs/books/EDITORIAL_CHARTER.md](#) is absolute: teach something concrete, show the working, claim nothing we have not earned. We never imply accreditation, recognition, endorsement or outcomes we do not hold.

— 1. The ten series

#	Series	Docs	Prefix	What it is	Primary LinkedIn use
S01	Body of Knowledge — Executive Summary	6	PCB	The executive-summary layer over the 13-domain BoK. The BoK itself is not republished — only its summary.	Flagship article + carousel
S02	AI in Project Controls Guide	12	AIG	The Institute's governed position on AI in a controls function	Newsletter series
S03	Competency Frameworks	10	CMP	What competence looks like, by discipline and by level	Carousels + employer PDF
S04	Code of Ethics	6	ETH	Professional conduct, and the casebook that makes it real	Posts + governance PDF
S05	Certification Handbook	8	CER	Everything a candidate must know before they book	Gated candidate pack
S06	Exam Blueprint	8	EXB	The published syllabus, item design and standard setting	Transparency posts
S07	Career Roadmap	8	CAR	Routes in, routes up, and what each rung actually requires	High-reach carousels
S08	Salary and Skills Report	6	SAL	The instrument and methodology for an honest annual market report	Annual flagship
S09	Best Practice Guides	20	BPG	The working core — how the job is actually done, correctly	Weekly teaching posts
S10	Free Templates	16	TPL	Tools a practitioner can use on Monday morning	Lead magnets
Total		100			

Full per-document register with IDs, titles, status and LinkedIn mapping: [00-framework/ASSET-REGISTRY.md](#).

— 2. Framework documents (the standard, not the content)

File	What it governs
00-framework/CANONICAL-FACTS.md	Read first. Every verified name, code, number and legal statement — and the ones that are not verified
00-framework/EDITORIAL-STANDARD.md	Voice, evidence rules, arithmetic discipline, prohibited moves, claims policy
00-framework/DOCUMENT-TEMPLATE.md	The canonical skeleton every one of the 100 documents follows
00-framework/FRONT-MATTER-SCHEMA.md	The YAML contract at the top of every manuscript
00-framework/ASSET-REGISTRY.md	The register of all 100 documents — the single source of truth
00-framework/LINKEDIN-PLAYBOOK.md	How a document becomes a post, carousel, newsletter or lead magnet
00-framework/PUBLISHING-CALENDAR.md	The 52-week sequence that ships all 100
00-framework/GOVERNANCE-AND-REVIEW.md	Review gates, versioning, corrections, legal risk, retirement
00-framework/PLATFORM-INTEGRATION.md	How the 100 documents reach readers through public_documents , and how they sit alongside the libraries the platform already ships
00-framework/validate.sh	The executable publication gate — run it before any batch is marked published
00-framework/build_pdfs.py + print.css	Renders every document to an A4 PDF in the Institute's house style
00-framework/REVIEW-NOTES.md	Items the authors flagged that need a subject-matter expert or an operator, not an editor

— 3. How this relates to what already exists

This framework **sits above** existing repository assets and does not duplicate them.

Existing asset	Relationship
docs/bok/ — the 13-domain Body of Knowledge (~1 MB of manuscript + PDF), authored under the retired PCP-AI code and now belonging to PCL-AI	Source of truth. S01 summarises it; S06 derives weightings from it; S09 must not contradict it. Never republished in full. Its internal PCP-AI naming is legacy — see 00-framework/CANONICAL-FACTS.md §1.
docs/downloads/ — candidate handbook, code of conduct, exam blueprint, glossary, formula sheet	Predecessors. S04/S05/S06 supersede and expand these; the originals stay as the platform's live downloads until the new versions are approved.
docs/publications/ — PCP-AI candidate information pack (01-04 + PDF)	Sibling. The candidate-facing pack; S05/S06 are the public, LinkedIn-facing treatment of the same facts. Facts must agree.
docs/books/ — PML-AI and PFL-AI book programme + EDITORIAL_CHARTER.md	Binding standard. Our editorial standard is a subset of that charter, tuned for short-form public documents.
docs/marketing/linkedin-launch-20-posts.md	Proven voice. The 20 launch posts are the tonal reference; the calendar in §2 continues from them rather than restarting.
backend/Data/TemplatesLibrarySeed.cs — 25 CSV templates already published in the platform	Complementary, not duplicated. The CSVs are instruments that deliberately carry no formulas; S10 supplies the method, the formulas and the completion guidance they cannot hold. Full mapping in 00-framework/PLATFORM-INTEGRATION.md §3.
backend/Data/PublicDocsSeed.cs — the seeded governance and candidate document set	The destination. Everything here publishes into the same public_documents version chain.

Rule: where a fact appears in both [docs/bok/](#) and here, the BoK wins. Where a fact concerns the live platform (fees, durations, pass marks, CPD hours), the platform's configured settings win — see §4 below.

— 4. The unverified-fact rule (read this before publishing anything)

Several documents in this framework naturally want to state operational specifics — examination fees, question counts, time limits, pass marks, CPD hours, validity periods, salary figures, market statistics.

Any such number is written as a bracketed placeholder unless it is confirmed from a cited source.

The examination comprises [\[CONFIRM: item count\]](#) items over [\[CONFIRM: duration\]](#).

Two categories, two rules:

1. **Platform-configured facts** (fees, item counts, duration, pass mark, validity, CPD): confirm against the Institute's live examination settings and the candidate pack in [docs/publications/](#) before publication. Do not infer them from a draft document.
2. **Market facts** (salaries, adoption rates, demand statistics): may only be published with a named, dated, verifiable source — or as output from the Institute's own survey run under [s08-salary-and-skills/](#). **Series S08 therefore ships as a methodology and instrument, not as invented numbers.** This is deliberate; see [SAL-01](#).

Illustrative figures used to teach a method are permitted everywhere, and are always labelled illustrative so no reader mistakes a worked example for market data.

— 4a. Building the PDFs

Every document renders to an A4 PDF in the Institute's house style — title page, a notice page carrying the founding-stage disclaimers, a contents page with real page numbers, then the body.

```

pip install markdown weasyprint pypdf                                # once

python3 docs/publication-framework/00-framework/build_pdfs.py      # all 100
python3 ../build_pdfs.py --framework                               # + the framework documents
python3 ../build_pdfs.py --series s09-best-practice-guides         # one series
python3 ../build_pdfs.py --id BPG-08                               # one document
python3 ../build_pdfs.py --packs                                   # + a combined PDF per series

```

Output lands in `_pdf/`, mirroring the series folders.

Why WeasyPrint and not headless Chromium. The house style depends on CSS paged media that Chromium's print path does not implement: running headers via `string-set`, and contents entries whose page numbers come from `target-counter`. Chromium renders the page and silently drops both.

Unresolved `[CONFIRM: ...]` placeholders render highlighted, not hidden, and every PDF states its placeholder count in the front matter. A document that is not ready to publish should look unready on the page — including after someone has printed it and carried it into a room.

— 5. Reading order for a new contributor

1. `00-framework/EDITORIAL-STANDARD.md` — how we write.
2. `00-framework/DOCUMENT-TEMPLATE.md` — the shape of a document.
3. `00-framework/ASSET-REGISTRY.md` — find your assigned ID.
4. The two or three neighbouring documents in your series, so yours joins a conversation already in progress rather than restating it.
5. `00-framework/GOVERNANCE-AND-REVIEW.md` — what your draft must survive.

— 6. Status

Every document in this framework is a **first authored draft** pending subject-matter-expert review. Nothing here is approved for publication until it has passed the gates in `00-framework/GOVERNANCE-AND-REVIEW.md` and every `[CONFIRM: ...]` placeholder has been resolved or removed. The registry tracks per-document status.
