Notice. This document is an educational publication of Project Controls Institute Global, Inc., and does not constitute accounting, tax, legal, financial or other professional advice. It must not be relied upon as such. Where a topic depends on the contract or the governing law, entitlement and treatment vary by jurisdiction; take local advice.

Standards. Standards and frameworks are referred to by name and described in this publication's own words. No standard's text, tables, diagrams or question banks are reproduced. All trademarks remain the property of their respective owners, and no endorsement by any standards body, employer or vendor is implied or should be inferred.

Status. Project Controls Institute Global, Inc. is a Delaware Non-Stock Corporation. The Institute has been developed with reference to ISO/IEC 17024 personnel-certification principles and is **not accredited** by ANAB, IAS or any other accreditation body. It intends to seek 501(c)(3) recognition, which has not been granted. No governmental approval, academic equivalence, or guaranteed employment, promotion or salary outcome is claimed or implied.

Examples. All worked examples are illustrative and fictional. Figures are chosen to demonstrate a method, not to describe any real project, organisation or market. Sample examination items, where they appear, are study material maintained separately from any live examination bank.

Completeness. Passages marked **[CONFIRM: ...]** are operational or market facts that have not yet been confirmed from a cited source. A document carrying them is a working draft and is not approved for publication.

Asset Registry — the 100 documents

The single source of truth for what exists. IDs are permanent citation keys and are never reused, even after retirement. A document that is not in this register does not exist; a register row without a manuscript is a gap, not a plan.

Legend — status: [draft](#) · [in-review](#) · [approved](#) · [published](#) · [retired](#) **Legend — LinkedIn format:** [post](#) · [carousel](#) · [article](#) · [newsletter](#) · [document](#)

— S01 — Body of Knowledge: Executive Summary (6) · prefix [PCB](#)

The executive-summary layer over the 13-domain Body of Knowledge in [docs/bok/](#). **The Body of Knowledge itself is not republished** — this series is the summary a busy reader will actually finish.

— S03 — Competency Frameworks (10) • prefix CMP

Built on the platform's seeded competency sets ([CANONICAL-FACTS.md](#) §7) — 14 for PCL-AI, 19 for PFL-AI, 24 for PML-AI. This series explains and assesses them; it does not invent a parallel scheme.

— S05 — Certification Handbook (8) · prefix [CER](#)

Facts must agree with the candidate pack in [docs/publications/](#) and the platform settings. Where they disagree, the conflict is written as a placeholder — see [CANONICAL-FACTS.md](#) §4.3.

— S06 — Exam Blueprint (8) • prefix [EXB](#)

— S08 — Salary and Skills Report (6) · prefix SAL

This series contains no salary figures. It is the instrument, methodology and reporting apparatus for an honest annual report. Numbers arrive only when the survey has been run. See [README.md](#) §4 and [SAL-01](#) for why this is a feature and not a shortfall.
