VERSION 1.0 · DRAFT

2026-08-05

PROJECT CONTROLS INSTITUTE GLOBAL, INC.

AI proposes. The professional disposes.

— About this document

Series	Publication Framework
Version	1.0
Status	draft
Date	2026-08-05
Unresolved placeholders	1

Notice. This document is an educational publication of Project Controls Institute Global, Inc., and does not constitute accounting, tax, legal, financial or other professional advice. It must not be relied upon as such. Where a topic depends on the contract or the governing law, entitlement and treatment vary by jurisdiction; take local advice.

Standards. Standards and frameworks are referred to by name and described in this publication's own words. No standard's text, tables, diagrams or question banks are reproduced. All trademarks remain the property of their respective owners, and no endorsement by any standards body, employer or vendor is implied or should be inferred.

Status. Project Controls Institute Global, Inc. is a Delaware Non-Stock Corporation. The Institute has been developed with reference to ISO/IEC 17024 personnel-certification principles and is **not accredited** by ANAB, IAS or any other accreditation body. It intends to seek 501(c)(3) recognition, which has not been granted. No governmental approval, academic equivalence, or guaranteed employment, promotion or salary outcome is claimed or implied.

Examples. All worked examples are illustrative and fictional. Figures are chosen to demonstrate a method, not to describe any real project, organisation or market. Sample examination items, where they appear, are study material maintained separately from any live examination bank.

Completeness. Passages marked **[CONFIRM: ...]** are operational or market facts that have not yet been confirmed from a cited source. A document carrying them is a working draft and is not approved for publication.

Front-Matter Schema

Every manuscript in this framework opens with a YAML front-matter block delimited by `---`. The block is the machine-readable half of the document: it drives the registry, the publishing calendar and the Downloads Centre import.

— 1. The block

```
---
id: BPG-08
series: S09
series_name: Best Practice Guides
title: Earned Value in Practice
subtitle: Making EV mean something on a real control account
version: 1.0
status: draft
date: 2026-08-04
authors: [PCI Editorial]
audience: [practitioner, manager]
level: practitioner
reading_time_min: 14
summary: >
  One-sentence-to-one-paragraph plain-language statement of what the reader gets.
linkedin:
  format: article
  hook: >
    The single sentence that has to earn the click, and that must be true on its own.
  tags: [ProjectControls, EarnedValue, CostEngineering, ProjectManagement]
  asset: carousel-8
gated: false
related: [BPG-06, BPG-09, TPL-07]
bok_domains: [6]
sources: []
placeholders: 0
---
```

2. Field reference

Field	Type	Required	Rules
id	string	yes	<code>PREFIX-NN</code> from the registry. Immutable once assigned — it is the document's permanent citation key.
series	string	yes	<code>S01-S10</code>
series_name	string	yes	Must match the registry exactly
title	string	yes	Sentence case, no trailing full stop, no marketing adjectives
subtitle	string	no	A clarifying second line; not a slogan
version	string	yes	<code>MAJOR.MINOR</code> . Minor for corrections and clarifications; major for a change that alters guidance.
status	enum	yes	<code>draft</code> · <code>in-review</code> · <code>approved</code> · <code>published</code> · <code>retired</code>
date	ISO date	yes	Date of the current version
authors	list	yes	[PCI Editorial] unless a named subject-matter expert has genuinely authored it. Never attribute AI-assisted text to a named expert who did not write it.
audience	list	yes	Any of <code>student</code> · <code>practitioner</code> · <code>manager</code> · <code>executive</code> · <code>employer</code> · <code>academic</code>
level	enum	yes	<code>foundation</code> · <code>practitioner</code> · <code>professional</code> · <code>leader</code> — matches the S03 competency levels
reading_time_min	integer	yes	Word count ÷ 220, rounded up
summary	string	yes	Plain language. Reused verbatim as the Downloads Centre description and the LinkedIn document blurb.
linkedin.format	enum	yes	<code>post</code> · <code>carousel</code> · <code>article</code> · <code>newsletter</code> · <code>document</code>
linkedin.hook	string	yes	Must be true standing alone, with no caveat withheld
linkedin.tags	list	yes	3–5 tags, no spaces, PascalCase
linkedin.asset	string	no	Companion asset to produce, e.g. <code>carousel-8</code> , <code>one-pager</code> , <code>checklist-pdf</code>
gated	boolean	yes	<code>false</code> = open download. <code>true</code> = email capture. Templates and teaching are ungated by default; only candidate packs and the annual report are gated.
related	list	yes	Real IDs from the registry. Minimum two, except where a document genuinely stands alone.
bok_domains	list	no	Domain numbers 1–13 from <code>docs/bok/</code> that this document draws on
sources	list	no	Named, dated, verifiable sources. Empty list is honest; a fabricated entry is a rejection defect.
placeholders	integer	yes	Count of unresolved <code>[CONFIRM: ...]</code> markers. Must be 0 before <code>status: approved</code> .

— 3. Validation rules

1. `id` is unique across the framework and matches its directory's series prefix.
 2. `status: approved` requires `placeholders: 0`.
 3. `status: published` requires an entry in `PUBLISHING-CALENDAR.md`.
 4. Every ID in `related` resolves to a real document in `ASSET-REGISTRY.md`.
 5. `reading_time_min` is within ± 20 % of the actual word count $\div 220$.
 6. `linkedin.tags` has 3–5 entries.
 7. `sources` entries are objects or strings that name the source and its date — never a bare URL with no context, never a plausible-looking citation that was not consulted.
-

— 4. Why the placeholder count is a field

Because it makes an unfinished document visibly unfinished at a glance and in a grep, rather than relying on a reviewer to spot a bracket buried on page four. `grep -c 'CONFIRM:'` across the framework is the release gate — see `GOVERNANCE-AND-REVIEW.md` §5.
