2026-08-05

PROJECT CONTROLS INSTITUTE GLOBAL, INC.

AI proposes. The professional disposes.

— About this document

Series	Publication Framework
Version	1.0
Status	draft
Date	2026-08-05
Unresolved placeholders	1

Notice. This document is an educational publication of Project Controls Institute Global, Inc., and does not constitute accounting, tax, legal, financial or other professional advice. It must not be relied upon as such. Where a topic depends on the contract or the governing law, entitlement and treatment vary by jurisdiction; take local advice.

Standards. Standards and frameworks are referred to by name and described in this publication's own words. No standard's text, tables, diagrams or question banks are reproduced. All trademarks remain the property of their respective owners, and no endorsement by any standards body, employer or vendor is implied or should be inferred.

Status. Project Controls Institute Global, Inc. is a Delaware Non-Stock Corporation. The Institute has been developed with reference to ISO/IEC 17024 personnel-certification principles and is **not accredited** by ANAB, IAS or any other accreditation body. It intends to seek 501(c)(3) recognition, which has not been granted. No governmental approval, academic equivalence, or guaranteed employment, promotion or salary outcome is claimed or implied.

Examples. All worked examples are illustrative and fictional. Figures are chosen to demonstrate a method, not to describe any real project, organisation or market. Sample examination items, where they appear, are study material maintained separately from any live examination bank.

Completeness. Passages marked **[CONFIRM: ...]** are operational or market facts that have not yet been confirmed from a cited source. A document carrying them is a working draft and is not approved for publication.

Contents

The argument the sequence makes 4

Q1 — The standard exists (weeks 1-13)..... 5

Q2 — AI, governed (weeks 14-26) 6

Q3 — How the credential is built (weeks 27-39) 7

Q4 — The profession (weeks 40-50) 8

Weeks 51-52 — Field and review 8

Sequencing rules (for when this calendar is edited) 8

Coverage check 9

Publishing Calendar

Fifty weeks, one hundred documents, two per week. Weeks 51 and 52 publish nothing new — they are the survey field window and the annual review.

The sequence is not arbitrary. It is ordered so that the Institute earns the right to make each claim before it makes it: teaching first, then the standard behind the teaching, then the credential built on the standard, then the profession the credential serves.

— The argument the sequence makes

Quarter	Weeks	Theme	What it establishes
Q1	1-13	The standard exists	We can teach the work, with arithmetic, better than the alternatives
Q2	14-26	AI, governed	We have a defensible position on the thing everyone is confused about — and a competency framework behind it
Q3	27-39	How the credential is built	Radical transparency: ethics, blueprint, standard setting, handbook
Q4	40-50	The profession	Career reality, and an honest market instrument rather than invented numbers

Q1 leads with best-practice guides paired to their templates because that pairing is the strongest thing the programme has: a method, then the instrument that runs it. Nobody has to trust the Institute to benefit from week two.

Certification content (Q3) deliberately comes **after** thirty-nine weeks of teaching. A body that has taught for nine months and then explains its examination reads very differently from one that opens with an enrolment pitch.

— Q1 — The standard exists (weeks 1-13)

50	SAL-05 Report template and data tables	document	SAL-06 Using market data honestly	article

— Weeks 51-52 — Field and review

No new documents.

- **Week 51** — the salary and skills survey opens, using [SAL-02](#). The instrument has been public for three weeks by this point, which is itself the methodological argument: anyone can inspect the questions before answering them.
- **Week 52** — annual review. Every document's status re-checked, corrections consolidated, the year's reader corrections acknowledged publicly, and the following year's calendar published.

— Sequencing rules (for when this calendar is edited)

1. **A guide ships before or with its template, never after.** The method earns the instrument.
2. **Nothing from S05 (certification) or S08 (salary) ships in Q1.** The Institute teaches for a quarter before it mentions its own examination, and never publishes a market instrument before it has published its methodology.
3. **SAL-05 never ships before SAL-01.** A report template released without its methodology invites exactly the misreading the series exists to prevent.
4. **EXB-08 (sample items) never ships before EXB-01 (the blueprint).** Sample items without the syllabus behind them read as a quiz.
5. **AIG-08 (governing AI) ships before AIG-11 (evaluating tools).** Governance first, procurement second — the reverse order is how organisations end up governing a tool they already bought.

6. **No more than two consecutive weeks from the same series.** The feed is a mixture or it is a monologue.
7. **A document with unresolved `[CONFIRM: ...]` placeholders cannot be scheduled.** It has not passed the gate in [GOVERNANCE-AND-REVIEW.md](#) §3, and the calendar is not a way around that.
