

Certuvo | OFFICIAL PREPARATION PLATFORM

PCI sets the standard. Certuvo is where you meet it.

Certuvo is the official preparation platform for the PCI AI certifications — PCL-AI, PFL-AI and PML-AI.

WHAT IT DELIVERS

Study and practice, fully online.

- Study aligned to the body of knowledge
- Scenario banks that mirror the exam
- Full-length mock examinations
- Progress and readiness insight

WHY THE FORMAT MATTERS

The exam is entirely scenario-based.

Every question puts you in a situation and asks for the best course of action. Certuvo's practice mirrors that format, so the examination feels familiar rather than surprising.

Recall is not the test.
Judgement is.

AND NOW THE IMPORTANT HALF

What this does not mean.

- × No role in setting the standard
- × No role in setting the cut score
- × No role in any certification decision

STATED PLAINLY

Completing the courses confers no advantage.

That sentence is from our published Impartiality Policy, not from this post. Preparation gets you ready. The examination is scored against the standard on demonstrated competence.

**A pass is earned.
It is never bought.**

WHAT CANDIDATES SHOULD KNOW

You do not have to use it.

Certuvo is the official preparation, not a requirement. Candidates may prepare however they wish — self-study, an employer programme, a recognised training partner, or nothing at all.

**Eligibility and the examination are
set by PCI. Only by PCI.**

WHY WE STRUCTURE IT THIS WAY

A credential is worth what it refuses to sell.

Separating preparation from certification is the single most important safeguard of impartiality. It is why the two are announced together with the limits attached, and why the limits are published rather than implied.

PCI sets the standard.
Certuvo prepares you for it.
Neither does the other's job.
